PROJECTS

A full-stack pc price Comparison web APP

- Developed a price comparison website for PC parts using **React.js** for the frontend and **Express.js** for the backend.
- Implemented **web scraping** techniques to gather **real-time price data** from multiple e-commerce websites.
- Designed and developed the user interface using **Tailwind CSS**, providing a responsive and visually appealing experience.
- Created **RESTful APIs** for data retrieval and processing, enabling users to compare prices across different platforms.
- Deployed the website to a cloud platform for public access, resulting in positive user feedback.
- Technologies Used: **React.js, Tailwind CSS, Express.js, Node.js, Web Scraping.**
- GitHub Repository → soon
- Live Site → soon

2. Web base Mini game website

- Small web app, made with friends to showcase our web games
- Create 2 out of 6 games, box runner and Dino run
- Make **responsive** UI for home site with the help of React and **tailwind** CSS, hosted on Vercel
- Optimize website so it will load faster and can use in mobile too
